- Python
- Java

ABOUT ME

I am a 4th grade student in Computer Engineering at Bursa Technical University. From my point of view, I think I gained a lot of experince in my licence area. I worked as an Intern at Pirahas Yazılım voluntarily. I worked on Front-End side of the project for 3 months. During my summer internship, I developed an Angular project about scrape data from GitLab and use them to make tables and graphs to see how many commits each person have. And, I am currently working on a live project called Workouth at the company ASSA Yazılım. I am currently an intern there. I was a dancer at high school. With my dance team, we traveled 16 different countries and met a lot of people from different cultures. These travels helped me to improve my communication skills with people. And dancing, improved my teamwork, leadership skills. I am currently dancing at Nilüfer Belediyesi Folk Dance Ensemble. In addition to all of that, I am looking forward to develop myself in my licence area by making projects and gaining work experience. Thank you for your interest.

Regards,
Bayram Atakan Koşdurma.

EXPERIENCE

FRONT-END / BACK-END DEVELOPER - INTERNSHIP

Assa Software & Consultancy - Bursa - October 2022 - January 2023

- To start with Assa Software, company develops web applications and mobile applications just like my other work places. I have been given tasks on ASP.NET Zero framework to learn back-end front-end development. I worked with the employees and got a taste of professional work life.

ANGULAR DEVELOPER - SUMMER INTERNSHIP

Codemine Software GmbH. - Bursa - August 2022 / September 2022

- First of all, the company gave me a project. They work with GitLab. Developers commit their works to the GitLab to keep the project updated. My project subject is developing an Angular Project that brings the committers with given conditions and print them to a graphic and table in a web page. I completed the project in 10 work days. For the remaining 10 days of my internship, I worked in their project and resolved issues for them.

LANGUAGES

- English *B2*
- German *A1*

HOBBIES

- Dance
- Cycling
- Motorsports

FRONT-END DEVELOPER - VOLUNTEER INTERNSHIP

Pirahas Software - Bursa - August 2020 / November 2020

- I started as an intern at Pirahas Software. To get used to the project, I started localizing their texts from Turkish to English. As a result of their Front-End Developer quiting the job, I started working as a Front-End Developer. After my school started, I left there to focus on my studying
